

Security Assessment Service

Background and Experience

LAB Information Technology, Inc. (LAB) consultants have performed detailed evaluations of high-rise, high-occupancy, public-access office buildings, campus facilities and private residences, including brokerage firms, financial institutions, hotels, estates, farms, and insurance companies.

What is performed?

We will critically examine your facilities, systems, safety issues, and high-value assets; give you a detailed risk assessment based on your business and personal requirements; and provide proven **LABSolved Diamond Methodology^{SM TM}** for enhancing security and managing your risks using current closed circuit television (CCTV), Digital video surveillance technology, Remote video surveillance, Access control, Radio Frequency (RF) devices, Information Technology Solutions, and fire / safety devices.

What is LABSolved Diamond Methodology^{SM TM}?

The LABSolved Diamond Methodology is our proprietary service mark and trade mark approach to assessing and delivering information technology and security technology solutions. This consists of 8 facets as on a diamond, with each facet symbolizing the attention spent in understanding and addressing that stage of the process. Listed below is each stage and overview of the process.

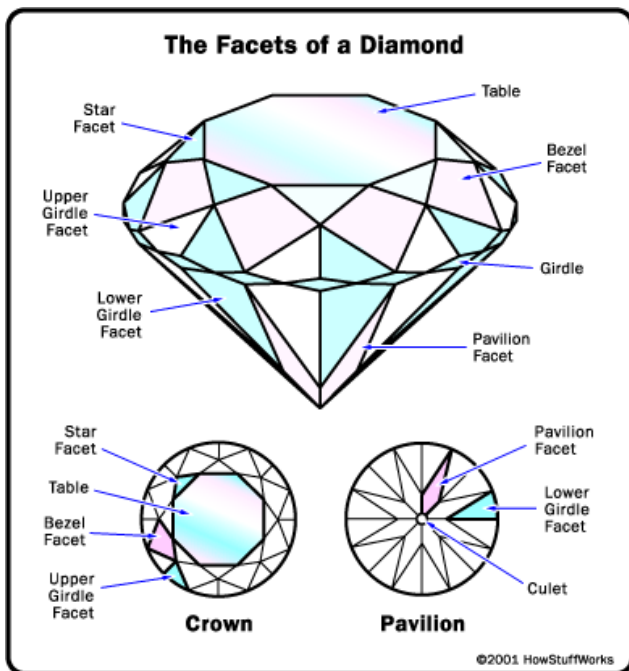

Table: Problem or Issue to Solve – Develop the specific understanding of the goal the customer is expecting to reach.

Star Facet: Requirements – Translate customer expectation into specific solutions, technology and products.

Bezel Facet: Needs Analysis – Evaluating the expect goal with the overall need and feasibility.

Upper Girdle Facet: Return on Investment – Evaluating the expect goal through cost benefit.

Girdle: Adjustments – Revise the solution based on evaluated expectation and translate into implementation.

Lower Girdle Facet: Planning and Management – Project planning and management to ensure services is delivered according to overall objective.

Pavilion Facet: Action – Deliver services and solutions as planned

Culet: Customer Satisfaction – Overall solution should bridge the gap for customer’s expected level of service and their perceived level of service.
